### COMP Cams® LST™ Camshafts for Ford 6.0L/6.4L Power Stroke Engines

**Memphis, TN** – COMP Cams® LST™ Camshaft series brings COMP's powerful Low Shock Technology lobe designs to Ford 6.0L/6.4L 2003-10 Power Stroke engines.

The LST™ Camshaft Series uses the newest and most advanced lobe designs from COMP Cams®. These new lobes provide the potential for major increases in power and torque in Power Stroke engines when combined with the appropriate tuning. The "Low Shock Technology" features lobe profiles designed to maximize additional engine airflow, which reduces harmful EGTs, while improving stability at higher RPM. These profiles are also easier on the valve springs, enhancing durability and reducing load loss.

Organized into stages that allow you to choose your level of performance, the Stage 1 Camshaft is No Springs Required and runs well with the factory or a performance tune. Stage 2 is also No Springs Required but does produce the greatest potential for additional power and RPM when matched with maximum effort tuning.

Part #435-300-13

#### Quick Facts

**Product:** COMP Cams® LST™ Camshafts for Ford 6.0L/6.4L Power Stroke Engines

**Part Number:** See Application Chart

**Street Price:** \$702.56

**Social Media Pitch:** The LST™ Camshaft Series for Ford 6.0L/6.4L Power Stroke engines features premium steel billet cams that unlock the potential for big power and torque gains.

#### **Features & Benefits:**

- Stage 1 Cam is No Springs Required for ease of installation and runs well with factory or performance-oriented tunes
- Stage 2 Cam offers the highest potential HP & torque gains when matched with performance tuning
- Low Shock Technology lobes reduce valve train shock and are easy on springs, allowing higher RPM, improved durability and reduced load loss

Engineered To Finish First.
